

The scope of work for the project consists of the replacement of the existing structure carrying the SR 8042 Ramps F and G over SR 0040. In addition, the roadway will be reconstructed 200 feet on each side of the structure on SR 8042 and some updating of the drainage, guide rail, and pavement marking will be done as well.

Weather permitting, construction activities (advance signing, clearing and grubbing, and tree cutting,) will begin on March 15, 2019. The Structure and Ramps F and G will be closed on March 25, 2019. A detour map is also enclosed.

We will be beginning Phase 2 of the project to remove the SR 8042 bridge over SR 40. In this phase SR 40 will be closed for two nights beginning on Wednesday April 3rd from 10:00 PM until 6 AM. If for some reason there is a cancelation, the following night will be used until the superstructure is removed. Daylight pattern on SR 40 will then be utilized throughout the summer to finish the demolition and build the new structure.
